## SUPERVISION OF STUDENTS

Students arriving at school each morning should be permitted to enter the building at the time the first bus arrives at the school. If it is necessary, in the principal's judgment, to require students to remain outside the building until immediately prior to the beginning of class activities or if students elect to remain outside until immediately prior to the beginning of class activities, a teacher or other responsible adult selected by the principal must supervise the students outside the building during the school's posted hours.

### Supervision to and from School

A district-owned system of school transportation is operated for the convenience of students residing in the district.

THE BUS DRIVER IS RESPONSIBLE FOR THE ACTION OF THE STUDENTS IN THE BUS AND HAS THE SAME AUTHORITY AS THE TEACHER IN THE CLASSROOM.

Only through the cooperation of those riding the buses can the district furnish the best and safest school transportation and keep the equipment in good condition.
